

Innovative Medical Products' Clip-On™ Pads for Use with De Mayo Hip Positioner® and Universal Lateral Positioner® Are a Better Fit for Increased Patient Protection

PLAINVILLE, Conn. (July 25, 2017) –Innovative Medical Products' Clip-On™ patient protective pads, made to work specifically with the De Mayo Hip Positioner® and IMP's Universal Lateral Positioner® (ULP), provide important advantages over traditional pads in ensuring patient protection and easier handling by OR staff:

- Base pad and lateral and anterior support pads for the ULP have special clips designed to eliminate adhesive buildup on the base, lateral and anterior supports of the positioners, substantially reducing staff clean-up time
- Clip-On™ pad is easy to apply to De Mayo Hip Positioner® with its adjustable lateral support pad
- Specially contoured Lumbar Pads improve patient stability and pressure distribution
- IMP's latex-free, dual compression, foam pads are effective in preventing skin irritation.

In addition to the latex-free Clip-On™ solution, the pads for the positioners' anterior support arms have a unique, patented, clover-leaf design that enables the rounded corners of the foam pads to collapse around the corners of the square plates for ultimate patient protection.

The Clip-On™ pads are included in IMP's "Value Added Commitment" (VAC) program where participants who use IMP positioners and softgoods exclusively, in accordance with IMP protocol, can receive value-added benefits and services for the life of their IMP positioners.

About Innovative Medical Products

Innovative Medical Products Inc.® designs, manufactures, and brings to market patient positioning devices for healthcare and sports related surgeries. With more than 40 years experience in supporting hospitals, surgery centers, and clinics, IMP provides positioning products that stabilize and protect patients during navigated, computer assisted and robotic surgeries. IMP devices save hospital and surgery center costs by minimizing staff, decreasing liability and improving the overall patient experience. IMP manufactures, patents and trademarks products to Federal and International standards for quality and safety for both the patient and the healthcare institution.
