

Innovative Medical Products' Universal SteriBump®: a sterile-ready, single-use, foam platform that saves valuable time in the operating room

SteriBump® frees up OR sterile assistants from having to hold a limb during certain surgical procedures

PLAINVILLE, Conn., (November 27, 2018) – Innovative Medical Products' pre-sterile Universal SteriBump® is a multi-use, foam support that is ideal for shoulder abduction during lateral shoulder arthroscopy, incision closure of total hip or knee surgery, vascular surgery, extremity trauma and carpal tunnel procedures.

SteriBump's® contoured, cradle-shape design provides a more secure elevated positioning of the patient's extremities in the sterile field, and its overall rectangular shape offers a choice of multiple heights and angles. Latex and lint free, IMP's rigid polyurethane-foam platform will not shift or move during surgery as often happens with cloth bundling. Using the SteriBump® is easier, faster and safer than bundling cloth towels for surgical procedures.

With the single-use SteriBump®, there is never a question of sterility -- eliminating cross contamination. The IMP solution not only reduces the potential for foreign particulates becoming airborne and entering a surgical site, but the sterile platform's consistent size and stable density prove to be less costly and less labor-intensive than having OR staff put together a handmade cloth bundle.

SteriBump®'s guaranteed sterility also frees up operating room scrub techs, nurses, or physician assistants from having to hold a limb during certain surgical procedures or having to bundle together sterile towels and other cloths to create a makeshift limb support. With the Universal SteriBump®, it's like having an extra pair of hands in the OR.

For more information about the Universal SteriBump®, please contact Innovative Medical Products, 87 Spring Lane, P.O. Box 8028, Plainville, CT 06062; phone: 860-793-0391 or toll free: 800-467-4944; or visit www.impmedical.com.

About Innovative Medical Products

Innovative Medical Products Inc® designs, manufactures, and brings to market patient positioning devices for healthcare and sports related surgeries. With more than 40 years experience in supporting hospitals, surgery centers, and clinics, IMP provides patient positioning accuracy to a surgical procedure including robotic and computer assisted surgeries. IMP devices save hospital and surgery center costs by minimizing staff to stabilize a patient or limb during surgery, as well as protecting the patient from the side effects of long surgical procedures. IMP manufactures, patents and trademarks products to Federal and international standards for quality and safety for both the patient and the healthcare institution.
