

DE MAYO

Universal Distractor 2.0™

EXTERNAL JOINT DISTRACTOR

Designed for External Knee Joint Distraction

The De Mayo Universal Distractor® 2.0 applies finite surgeon control pressure to the femur, creating an unobstructed view into the knee joint.

Actual view of joint distraction.

Sterile Patient Protective Distractor Pad protects the popliteal area.

Tension release lever to fine-tune spacing or disengage distraction.

Hand control for finite adjustment of distraction.

Multiple positions on the distractor block allow for leg length adjustment.

KEY FEATURES

- Compatible with all De Mayo Knee Positioners
- Creates an unobstructed view into the knee joint without the use of lamina spreaders
- Improves access to the posterior aspect of the joint for removal of osteophytes, resected bone, retained cement, and ease of cautery and pain management techniques
- Allows for easy insertion of instruments, trials, and implants while performing Uni, TKA, ACL, and Tibial Plateau surgeries
- Improves minimally invasive surgery techniques for component insertion and prevents component damage
- Create reliable visualization from procedure to procedure for consistent, reproducible results
